Polyester

Available only in Beige

BEIGE 9203C

Fade Resistant

It is provided by solution dyeing method which is a yarn coloration process in which pigment is added to the polymer melt before the fiber is extruded into yarn. The color, therefore, is an inherent part of the yarn itself. Its colors are the most permanent. The solution dyeing process is, in addition, environmentally friendly and efficient, using little water or energy.

Colorstayness, Durability and Reasonable Price

Spuncrylic is highly resistant to color loss through fading from sunlight, and ozone, it's neat, nice touch and breathable Spuncrylic also provides good stain resistance and water repellency. In addition, UPF is at least 100+.
